

Press Release**COMSOFT Solutions delivers next phase for Myanmar's AIM Roadmap****Myanmar completes the final step in the ICAO AIS to AIM Roadmap implementation thanks to COMSOFT Solutions complete AIM product suite**

The Department of Civil Aviation of the Republic of the Union of Myanmar (DCA Myanmar) completed site acceptance of Comsoft Solutions' AIM system, transforming their aeronautical information management and thus supporting their increasing air traffic.

The project consisted of a complete AIM solution to consistently manage all aeronautical information, in order to guarantee high data quality. Comsoft Solutions' highly advanced CADAS products provide information management of AIXM 5.1 Aeronautical data, NOTAM, and flight planning, including pre-flight briefing services. The next and final step in the project will be to bring data driven Aeronautical charting into operation, which will be based on the GIS based SmartCharting tool from Frequentis.

Local company COMSOFT – CARPE DIEM Ltd are aviation consultants on the project to modernise Myanmar's Aeronautical Information Management (AIM) infrastructure in light of increasing air traffic, essential airspace optimisation and the crucial changeover from Aeronautical Information Services (AIS). The contract and commissioning of stage two of the project took just 18 months to complete, including data migration for AIP and aeronautical charting.

Air traffic in Myanmar in Southeast Asia has been rising dramatically, with international passengers increasing by over 65% between 2012 and 2015. Plans for the country to reach 7.5 million tourists by 2020 also confirmed the need for a modernised air traffic infrastructure. Completion of the project will turn DCA Myanmar into an AIM leader in the region, and ensure they are fully in line with the ICAO AIS to AIM Roadmap and related regulations.

**About COMSOFT Solutions GmbH**

---

COMSOFT Solutions GmbH was founded in 2016 from major assets of the previous COMSOFT GmbH, which was established in 1979. The company is now a member of the FREQUENTIS Group, with expertise that cover a vast proportion of the modern ATM industry, providing market-leading AMHS and AIM products, and innovative surveillance and communication solutions such as ADS-B and Multilateration sensors.

The high quality portfolio and skilled team, coupled with the FREQUENTIS Groups vast expertise, will continue to develop innovative solutions for the ATM Market, consistent with international standards. COMSOFT – CARPE DIEM LTD is the official contract partner of the DCA and a registered Myanmar Company located in Yangon.
